

MachineTranslation.com API Documentation

[Copy](#)

Overview

The MachineTranslation.com API provides a streamlined and efficient way to translate text between different languages. This API focuses on a simple process: receiving the source text, performing the translation, and sending back the translated text. It supports multiple translation engines, ensuring reliable and high-quality translations for various language pairs.

Base URL

```
https://api.machinetranslation.com/v1/translate
```

Authentication

The API uses BEARER for authentication. Include your API key in the `Authorization` header for each request.

Example

```
Authorization: BEARER <your_api_key>
```

Request an API Key

To access the MachineTranslation.com API, you need an API key. [Contact us](#) to request for an API key.

Endpoints

Create Translation

Translate text from one language to another using a specified translation engine.

HTTP Request Method

POST

Headers

- Authorization: BEARER <your_api_key>
- Content-Type: application/json

Request Body

```
{
  "text": "The text you want to translate",
  "source_language_code": "source_language_code",
  "target_language_code": "target_language_code"
}
```

- `text`: (string) The text to be translated.
- `source_language_code`: (string) The language code of the source text (e.g., "en" for English).
- `target_language_code`: (string) The language code of the target text (e.g., "hi" for Hindi).

Example Request

```
curl --location 'https://api.machinetranslation.com/pv1/translate' \
--header 'Authorization: BEARER <your_api_key>' \
--header 'Content-Type: application/json' \
--data '{
    "text": "MachineTranslation.com translates, compares, and
recommends the best translations.",
    "source_language_code": "en",
    "target_language_code": "fr"
}'
```

Response

```
{
  "translations": [
    {
      "engine": "google",
      "share_id": "cf733e14-ea86-4f6b-92fc-de9813197601",
      "source_text": "MachineTranslation.com translates,
compares, and recommends the best translations.",
      "target_text": "MachineTranslation.com traduit,
compare et recommande les meilleures traductions.",
      "source_word_count": 8,
      "target_word_count": 8,
      "source_language_code": "en",
      "target_language_code": "fr"
    },
    ...
  ],
  "meta": {
    "short_url":
    "https://machinetranslation.com/translations/cf733e14-ea86-4f6b-
92fc-de9813197601",
    "total_words": 8
  }
}
```

- `translations`: An array of translation results from different engines.
 - `engine`: (string) The translation engine used.
 - `share_id`: (string) The share ID of the translation.
 - `source_text`: (string) The original text.
 - `target_text`: (string) The translated text.
 - `source_word_count`: (number) Word count of the source text.
 - `target_word_count`: (number) Word count of the translated text.
 - `source_language_code`: (string) Language code of the source text.
 - `target_language_code`: (string) Language code of the translated text.
- `meta`: Metadata related to the translation request.
 - `short_url`: (string) Short URL for the translation.
 - `total_words`: (number) Total word count of the source text.

Supported Languages
